Project name	ToyCraft Tales: Tableau's Vision into Toy Manufacturer Data
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

In this project,our team of five data analysts set out to explore how toy products perform—from factory to store shelf—using Tableau dashboards.

We focused on two key questions:

1. How do toy categories perform across regions and time?
2. What trends in sales and operations can help improve efficiency?

The dataset included details like product categories, customer types, regional sales, purchase dates, and inventory data.

We began with a brainstorming session where each member shared ideas. We then grouped and prioritized them based on complexity, effort, and impact. This helped us focus on the most valuable insights and assign tasks based on team strengths.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Template

200

2-8 people recommended

④

To run an smooth and productive session

Go for volume. If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10minutes

TIP
You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing

Yaswini

Dispalying gender wise customer preferences

Compare branch-wise sales across cities

Tracks best-selling toy types by age group

Vennela

Displays best-selling toys and top-performing distribution hubs

Age group targeting

Displaying sales by price ranges

Vishnu Vardhan

Track inventory turnover rate

Analyze seasonal trends in toy demand

Identify seasonal spikes in toy sales

Sadguna

Spot overstock and understock issues

Understanding customer satisfaction through ratings and reviews

Visualize repeat purchase patterns

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Step-3: Idea Prioritization

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⌚ 10 minutes

Participants can use their names to point at where others agree or don't on the grid. The facilitator can confirm the spot by using the open pointer tool (see #1) on the keyboard.
